2. Semicircular spaces of a size large enough to hold a man are located in the trenches, at five or ten meter intervals. Machine gun emplacements, covered with earth and trees, are located at the high points in the trench line.

3.  the location of 10 cylindrical-shaped bunkers, each with four embrasures, located as follows:

25X1

a. Three situated southeast of Debelt (N 42-24, E 27-16), as follows:

- (1) One located 1.5 kilometers west of the Burgas-Elkhovo highway;
- (2) Two located approximately five kilometers east of the Burgas-Elkhovo highway.

These bunkers were built in 1942 or 1943 and, although neglected, they are in a serviceable state except for the barbed wire entanglements which have been destroyed.

b. Four or five bunkers facing the sea at a position approximately one kilometer east of Meden Rudnik village, between Mandren and Burgas lakes; and

c. Two located on either side of the Burgas-Momina Tsirkva highway, just north of Fakiya.

(A sketch based on a free-hand drawing  showing the approximate location of these bunkers is included as an Appendix on page 3).
